Pogo Pin

Rear Bracket

Installation
## Step 1: Integrated Wall Bracket Installation
### Without embedded junction box in the wall.

According to the position of the cable, cut a circular hole in the wall of the diameter of 68mm and depth of 50 mm that can accommodate and through out all necessary cables.
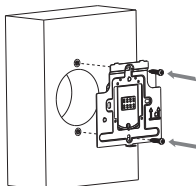

Place the integrated wall bracket in the cut hole and adjust to the horizontal position. Mark the upper and lower screw holes as the pic shown above.
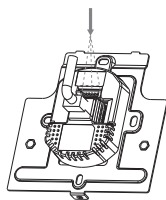

Remove the integrated wall bracket and use the 5 mm drill to drill 2 screw holes with a depth of 25 mm at the marked position, then insert the 2 screw fixing seats provided.
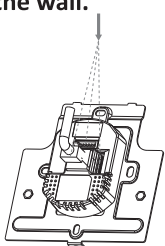

Finish the bracket installation.

Fix the integrated wall bracket on the wall with two ST4x20 screws.
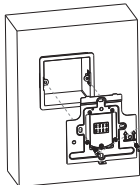

Connect the cables to corresponding ports of integrated wall bracket.

### With embedded one-gang junction box (86x86mm or 2x3 inches in size) in the wall.

Connect the cables in embedded box to corresponding ports of integrated wall bracket.

or

**With 86x86mm junction box**

Fix the integrated wall bracket to the junction box with two M4x30 screws.
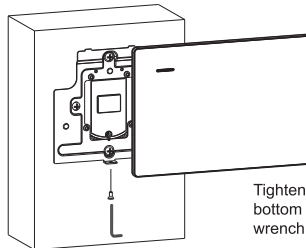

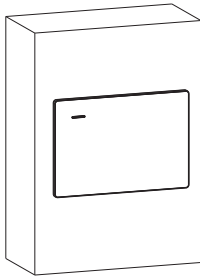

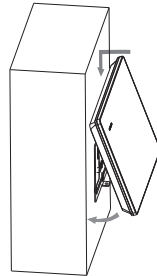

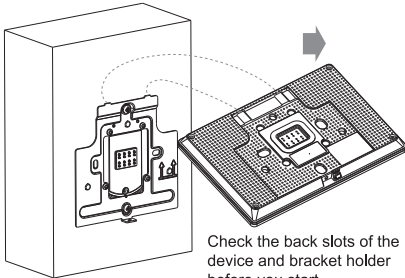

With 2x3 inches junction box

Fix the integrated wall bracket to the junction box with two M4x20 screws.

Finish the bracket installation.

Step 2: Device Installation

Check the back slots of the device and bracket holder before you start.

Place the device carefully from top to bottom with its bottom part slightly away (up to 3 cm) from the wall. When the device fits to the bracket holder supports, push the device bottom part onto the bracket. Make sure the device was safety attracted to the magnets.

Finish the device installation.

Tighten the M2.5x6 screw on the bottom of the device with allen wrench.

Configuration

1. Access IP address: After setting up network and power, hold the Hangup Touch Key ☎ about 5s, it will announce IP address automatically, press again to stop.
