

## Secure Access, One Press Away

This exit button features a brushed stainless steel faceplate and a durable, vandal-resistant mechanical button with a built-in LED indicator. Designed to fit standard US single-gang wall boxes, it provides clear "PRESS TO EXIT" labeling and momentary operation. The LED offers visual feedback, making it ideal for offices, secure areas, and access control systems.

## At a Glance

- **LED Indicator** – Blue light for visual status feedback (6–12V input)
- **Stainless Steel Build** – Durable 1.7 mm panel with brushed finish
- **Momentary Action** – Self-resetting mechanical push button
- **High Durability** – IK10 impact protection, 40,000h LED lifespan
- **US Wall Box Compatible** – Fits standard single-gang size (115 × 70 mm)

## Specifications

- |   |   |
|---|---|
| • Dimension: 115 mm (L) × 70 mm (W) × 29.2 mm (H) (±3 mm) | • Operating Temperature: -20°C to +50°C               |
| • Material: 1.7mm Stainless steel panel                   | • Storage Temperature: -20°C to +65°C                 |
| • Operating Voltage: DC 12 - 24V                          | • Operating Humidity: 10%–90% RH                      |
| • Rated Current: 5A                                       | • Impact Protection Rating: IK10                      |
| • Indicator Type: LED                                     | • Environmental Compliance: RoHS, REACH, Halogen Free |
| • LED Lifespan: 40,000 hours (typical)                    |   |
| • LED Color: Blue   |   |
| • LED Working Voltage: 6 - 12V                            |   |
| • Voltage Regulation: Built-in dropper resistor           |   |
| • Switch Type: Momentary (self-resetting)                 |   |
